THE MONK'S KETTLE

Bottled Beers

All bottles 12oz unless otherwise noted

Lagers

Lagers use bottom-fermenting yeasts that fall to the bottom of the vessel during fermentation. This fermentation is done at cooler temperatures, around 41 - 48 degrees F, with maturation at or close to 32 degrees F. The result is a clean, well-rounded beer from the yeasts working more slowly and thoroughly through the malt sugars.

Pilsner

Light to straw in color, and clear. These lagers have a present hoppiness, while maintaining a good malt character, and are incredibly smooth and crisp

Mama's Little Yella Pils (Can).....	Oskar Blues Brewery, Lyons, CO	5.3.....	\$5.00
Prima Pils.....	Victory Brewing, Downingtown, PA.....	4.9.....	\$5.00
Pinkus Pils (16.9 oz).....	Brauerei Pinkus Mueller, GER	5.2.....	\$11.25

Aecht Schlenkerla Märzen (500 ml)	Brauerei Heller, Bamberg, GER	5.4.....	\$14.00
Aecht Schlenkerla Urbock (500 ml)	Brauerei Heller, Bamberg, GER	6.6.....	\$14.75

We all know what this is.

---------------------	---------------------------------	----------	--------

Ales

Ales are brewed using top-fermenting yeasts, meaning the yeast rises to the top of the brewing vessel during fermentation. More often than not, this is also done at higher temperatures than Lagers, (60-75 degrees F), and needs less time for maturation. Ales are characterized by their subtlety, complexity, and fruity/floral flavors and aromas.

Small Beer

Historically an ale brewed for peasants, laborers and children, the modern small beer is made by re-using the mash intended for a strong ale (usually a barley- or wheat-wine style ale) to produce a lighter bodied, biscuit-dry ale with relatively low alcohol; possibly the perfect lunchtime burger beer.

Anchor Small Beer (22 oz).....	Anchor Brewing, San Francisco, CA.....	3.3.....	\$9.25
--------------------------------	--	----------	--------

Hefe Weizen

An unfiltered, German style of beer, with a high ratio of wheat that produces a cloudy appearance, and a palate and aroma that usually includes bananas and cloves.

Schneider Edelweisse (500 ml).....	G. Schneider & Sohn, Kelheim, GER.....	6.2.....	\$12.75

Aventinus (500 ml).....	G. Schneider & Sohn, Kelheim, GER.....	8.2.....	\$11.75

Eisbock

Water freezes before alcohol, so one way to reach a higher alcohol content in a beer is to freeze and remove a portion of the water. That is done in these bocks, with the result being a full bodied, malty lager with a higher alcohol content.

Aventinus Weizen-Eisbock	Aventinus, Kelheim, GER.....	12.....	\$14.75
--------------------------------	------------------------------	---------	---------

Kölsch

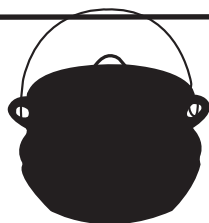

Traditionally brewed in Cologne, Germany, Kölsch is a pale top-fermented ale. Often confused with its distant cousin the Pilsener, Kölsch is a medium-bodied dry ale often having vinous (grapey) qualities.

Leireken Wild Berries (750 ml)	Brouwerij Strubbe, Ichtegem, BEL	5.2	\$26.25

Belgian Ales

The Belgians have taken the art of brewing to a level unto themselves. From the Trappist brews (a designation allowed to only the 7 Trappist monasteries), to Abbey beers (the non-Trappist, trappist beers) to their wheat beers, their Lambics and beyond; these are the ultimate craft beers. The brews below are artisanal masterpieces, and obviously deserve a class of their own.

Lambic

Lembeek, Belgium is the birthplace of the use of 'wild' yeasts and spontaneous fermentation. Brewers there still traditionally cool their brews in the attic of the brewhouse overnight with the windows open, to invite wild yeasts to visit their brew. The classics are tart and citric, and use the Brettanomyces yeast that imparts its "horse blanket" aroma and flavor. Many add fruit once fermentation has begun to sweeten the brew, creating an especially tasty beer. Bottling dates are listed in brackets [] when provided by the brewery.
